WEBINAR DESCRIPTIONS

SAGE ACCPAC ALERTS: Alerts Lite is now included Free of Charge with Accpac ERP v5.6. Sage Accpac ERP Alerts is a 'watchdog' you 'train' to notify specific users of events that are occurring in the Accpac database. For instance, a salesman could receive an email letting him know when one of his customers has been placed on hold; A CFO could receive an email notification when a check for over \$50,000 is issued; Key personnel are sent an email with an open Accounts Receivable first thing Monday morning. See how you can proactively manage and monitor your business with minimal effort.

SAGE ACCPAC INTELLIGENCE (SAI): Sage Accpac Intelligence First User is now included Free of Charge with Accpac v5.6. SAI empowers you to quickly and easily obtain the information you need for operations and strategic planning from your Sage Accpac solution. Effortlessly create reports and analyze data, utilizing the familiar Microsoft® Excel® application.

SAGE CRM: SageCRM is an easy-to-use, fast to deploy, on-premise or on-demand CRM solution. It provides enterprise wide access to vital customer information anytime, anywhere so you can better manage your business with an integrated approach to field sales, inside sales, customer care and marketing.
