

Alerts Server

Deliver the information needed to create highly responsive, proactive, customer-facing organizations.

Alerts enhance communications from your company's back-office, front-office, and e-commerce systems by monitoring data fields for a significant activity. The program automatically communicates specified activities to appropriate customers, employees, or business partners.

For you, that means automated processes that reduce delivery cycle time and accelerate revenue. For your customers, that means doing business with a company they can count on for efficient, reliable, and attentive service.

With the Alerts Library, you can:

- Set up and monitor date- and time-sensitive events.
- Check status of data, such as credit holds, inventory thresholds, sales ratios, urgency levels, and priority client transactions.
- Merge data into e-mail messages.
- Pass data, files, and messages to the next person in the pipeline.

Sage Accpac Alerts Library

You get ten built-in Sage Accpac Alerts when you buy the Alerts Server. They include:

- Credit Status Change
- Orders Not Shipped by Due Date
- Low Inventory Notification
- PO Greater than \$5,000

ACCPAC HR Series Alerts Library

Over 25 HR Series Alerts are available for purchase separately. They include:

- Employee Birthday Card
- New Hire Eligibility
- Notification of Leave Taken
- Performance Review
- Termination Process

Alerts provide a voice to the data that is locked away in corporate database applications!

Why you should use Alerts Server

- "No programming required" approach automates business processes across the enterprise.
- Keep employees and business partners informed for better decision-making.
- Improve customer service and retention.
- Provide 24/7 response to changing business conditions.
- Customizable, off-the-shelf package that is easy to implement and easy to modify as your business requirements grow and change.
- Automated processes reduce delivery cycle time and accelerate revenue.
- Existing alerts can be modified and new ones can be created.

Compatible with:

Sage Accpac ERP (formerly ACCPAC Advantage Series—all editions)
ACCPAC HR Series

Note: The server connects with two databases. Additional database connections can be purchased separately.
